### COURSE TEXTS

Michael Parkin, *Macroeconomics*, 13th edition

### COURSE DESCRIPTION

This macroeconomics course will help you understand many facets of the world in which we live. For example, after completing this course you will understand why the government investigates large companies such as Microsoft to determine if they are in violation of the nation's antitrust laws. You will know what factors change the price and quantity of the goods and services we buy.

You will learn why the government may need to impose strict environmental regulations. You will also understand why government action in many instances may be counterproductive and actually harm the nation's well-being. Indeed, you will know all this and more! Students tell me that this course helps them operate their own business, though I think there are other courses, which have this as a more direct goal.

### COURSE OBJECTIVES AND OUTCOMES

After completing this course student will be able to:

- Understand the factors that determine the prices and quantities of products.
- Understand how unemployment, inflation, and GDP (Gross Domestic Product) are measured and calculated.
- Discuss the factors that help determine the rate of our economic growth.
- Explain how government policies, such as changes in government purchases or taxation, affect the nation's economic climate.
- State how the quantity of money is controlled in the United States and discuss the impact that changes in the quantity of money have on the nation's economy.
- Explain what factor determines the inflation rate and how inflation affects the nation's interest rates.

## GRADING

The course grade is based on the seventeen assignments (50%) and the final exam (50%). You must pass the final examination in order to pass the course. This fact always makes students nervous. In my more than a decade of teaching this course, I discovered that most students who take the final exam have no problem passing it.

Students who are unable to pass it are those who have copied answers from the book when completing the lessons, rushed through the course in two or three weeks, or have a vast majority of assignments with C's, D's, and F's and only a few A's or B's. Most students who are ready to take the exam find that their assignments have received mainly A's and B's (students who are getting poorer grades tend to drop out) and, in the years I've taught this course, such students have never failed to pass the final exam!

## GRADING CRITERIA

Your course grade will be determined as follows:

Written Assignments	50%
Final Exam	50 %
Total	100%

## COURSE GRADING SCALE

The course letter grade will be determined according to the following scale:

- A = 90-100
- B = 80-89
- C = 70-79
- D = 60-69
- E below 60
